### **Geek Speak: Metapatterns**

From Dr. Liz Fayer and Dr. Joanna Jones

Metapatterns are patterns that are so widely observed that we see them in nature, culture, design, and innovation! In this GEEK SPEAK we will look through the lens of the past at how Black Elk, an Oglala Lakota, saw these patterns many years ago to the present and how these patterns are used in exciting new innovations! The audience will then get involved in a Google Jockey to find more Metapatterns in Nature, Culture, Design, and Innovation focusing on Spheres and Cycles, Tubes and Arrows, and Sheets and Layers! Once you begin to see the patterns, you will never look at everything around you in the same way!

**(Bonus Pre-Speak! This lecture will also be hosted at the Jacket Zone at 1:30 p.m. on Thursday, April 20 at 617 Main Street. Contact the Jacket Zone at 717-5801 with questions.)**

All lectures are held in Jonas 110 at 4:00 p.m. on Thursdays and are free and open to the public.
