

Tap Water Window Cling/Badge Application

“Turn Back to Tap” is an initiative that encourages people to reduce single use plastic waste by turning back to tap. The badging program lets our community and visitors know that your business is a supporter of tap water. Turn Back to Tap believes in reducing plastic waste and helping to reduce our carbon footprint. Tap Water is more cost-efficient, is not any less safe, and tastes just as good as bottled water!

Once your application is received, we will visit you at your establishment and give you your Turn Back to Tap badge so that everyone in the community is aware that you support tap water. For more information, please visit our website at BHSU.edu/TapWater
