

Plan a career in Dental Hygiene

Prepare For Your Future

A dental hygienist is a licensed dental professional who specializes in preventive oral health. Typically working with a dentistry office, dental hygienists provide specialized cleanings for patients, take prescribed radiographs, and provide instructions for dental care.

Entering a career as a dental hygienist is a difficult but rewarding task. Your first step is to earn an associate's degree from BHSU. We have created a recommended program of study that will make your journey to becoming a dental hygienist a reality.

Courses available as part of your bachelor's degree that will prepare you for your career goals:

- BIOL 121 - Basic Anatomy & 121L Lab
- BIOL 123 - Basic Physiology & 123L Lab
- BIOL 231 - General Microbiology & 231L Lab
- BIOL 286 - Word Origins
- CHEM 106 - General Survey I & 106L Lab
- CHEM 107 - General Survey II & 107L Lab

pursue your degree:

The best option is to pursue an associate degree in Applied Health Sciences.
