

# Plan a career in Pharmacy

## Prepare For Your Future

Pharmacy is an exciting and growing field. A pharmacist is a professional specialist in the science of drugs who possesses comprehensive knowledge of all medications.

In recent years, the responsibilities of pharmacists have increased from dispensing medicines to also consulting with physicians, directing patient care, and conducting patient education. Pharmacists work in a variety of settings: community pharmacies, hospitals, home health care, nursing homes, health maintenance organizations, research, teaching, quality control, and product development. Other opportunities for pharmacists are found in research or manufacturing businesses, colleges or universities and various departments in the government.

Earning a bachelor's degree in chemistry or biology is the first step on your journey to become a pharmacist. There are several options across the nation for professional school including bachelor, master, and doctorate pharmacy degrees. Visit with your advisor as you determine the best path to meet your career goals as a pharmacist.
