

Plan a career in Agriculture

Prepare For Your Future

This program gives students a strong biological background to apply to the practical aspects of agriculture or advance to graduate school.

A bachelor's degree in biology or business prepares graduates for agriculture and/or agricultural related entrepreneurial careers.

Students who are interested in an advanced degree would then be prepared to enter a master's program in research planning, sustainability, advanced agronomy, or other related areas of study. Students are encouraged to consider graduate school to earn a Ph.D. degree if they are planning to teach at the college level or for advancement to administrative research positions.

Courses available as part of your bachelor's degree that will prepare you for your career goals:

- BIOL 151 - General Biology I & 151L Lab
- BIOL 153 - General Biology II & 153L Lab
- BIOL 301 - Plant Systematics & 301L Lab
- BIOL 357 - Invertebrate Zoology & 357L Lab
- BIOL 461 - Agrostology & 461L Lab
- CHEM 112 - General Chemistry I & 112L Lab
- CHEM 114 - General Chemistry II & 114L Lab
- ENGL 101 - Composition I
- ENGL 201 - Composition II
- ECON 201 - Principles of Microeconomics
- MATH 102 - College Algebra
- PHYS 111 - Introduction to Physics I & 111L Lab
- PHYS 113 - Introduction to Physics II & 113L Lab

pursue your degree:

Depending on your interests, you could pursue a degree in:

- Biology
- Business
