

At Vast Broadband, we value being a part of each of the communities we serve. At this critical time, we want to make sure we are doing all we can to assist those in need. To that effect, we want to work with you in order to provide essential broadband services to all students that do not currently have broadband internet service at home.

Vast will offer the following to those students in this time of need:

- Free Vast Essentials Connection (30 mbps download speed/5 mbps upload speed) and wireless modem for 2 months.
- No Standard Installation Fees or Contracts.

In order to qualify for this program, the university will need to verify the needs of the student and contact Vast Broadband on behalf of the student in order for service to be activated. Again, to qualify, the student must not have broadband services at this time.

If you feel you qualify, please contact the BHSU Help Desk via email at BHSUHelpDesk@BHSU.edu or via telephone at 605-642-6580. Please be ready to provide your contact information and be sure include that you would like to take advantage of the VAST offer.

VAST Goal - Provide Students who don't have current home Internet Access and can't afford it 60 days of free Internet for remote learning purposes.
