Women in Science

is a free, one-day career learning workshop designed to provide young women in grade 7 with engaging opportunities to learn about careers in Science, Technology, Engineering and Mathematics (STEM).

You are invited to this conference at the

**Black Hills State University campus on
Wednesday, May 13, 2020.**

Enrollment is limited to the first 500 students who are registered on a first-come, first-served basis.

After a brief keynote presentation and introduction, groups of 20 students will be guided to visit the exhibits and interact with individual speakers during sessions throughout the day. Speakers will present in the areas of Biology, Chemistry, Physics, Astronomy, Geology, Health Care, Mathematics, Environmental Science, Sustainability and other STEM career opportunities.

By showcasing successful women as positive role models, we hope to encourage students to take the math and science track through middle and high school and eventually pursue an engaging and successful STEM career.

A free lunch will be provided to all students, teachers and chaperones at the BHSU dining hall in the student union.
